

COMPETITIONS

Meet Director Emily Ellithorpe

Competitions that follow the spirit and specifics of this rule book will be considered sanctioned competitions. The competition is then bound to follow the rules, procedures and all aspects of this rule book.

Each sanctioned competition must have a MEET DIRECTOR who is responsible for all aspects of any NEILA Sanctioned Competition including planning, logistics, operations, finances, security and safety. The Meet Director can also act as the head judge for disputes.

Event Judges Zach Brown

Each event must have a designated judge that is responsible for implementing the event at any competition. Such persons will be referred to as Event Judges. Event Judges will be recruited/hired by the Meet Director.

Event Judges will be familiar with the NEILA rules and scoring procedures. Event Judges should be **compensated financially** for their service from revenue generated by “entrance fees.” Any disputes between competitors and Event Judges will be resolved by the Meet Director.

Timers Alumni Teams and Additional Volunteers

Each event should have at least one person helping the Event Judge that is operating a stopwatch. Timers responsibility is to time from the start to completion for each event be it singles, doubles, triples or the entire team. There can be as many timers as necessary per event. Timers can be compensated financially.

Scorekeepers Jill Rahn

Scorekeepers are responsible for collecting scores (*or times*) for each event from Event Judges and tracking all scores in digital format. Scorekeepers must ensure the accurate tracking of scores and apportionment of “points” that are earned for each participant in each event. Scorekeepers should be compensated financially. Scorekeepers should utilize at least 2 different computers to input and track scores so as to minimize any human error.

GENERAL RULES

It is the intent of these General Rules to provide a summary and description of the sport and penalties for rule infractions. Disqualifications of any team or individual may result only from cheating, gross violations, or unsportsmanlike behavior. The Meet Director is the only person who may disqualify any individual or a team. In all cases it is the intent of the individual Event rule that will be used to interpret possible violations of the spirit of fair play and the NEILA Guiding Principles.

Divisions

There will be a men's division, a women's division, a jack and jill division; and an open division; (*See below*) each scored separately.

Teams

Official teams will consist of six contestants plus an alternate(s) who may replace an injured teammate for the duration of the competition. The Meet Director must approve all replacements.

All contestants on teams entitled to a trophy/standings must be enrolled at the school they represent, or alumni of a member institution. Alumni participation must be approved by their respective academic institutions so as to be covered on the insurance rider. Teams can be mixed with athletes representing different schools, but such teams are not official teams and therefore cannot compete for trophies/standings. (*The intent of this rule is for inclusion. For example, if a school does not have enough athletes to comprise a complete 6-person team, athletes can 'join' another team to complete a 6-person team.*)

Team Composition

Jack and Jill Division teams must consist of three men and three women in order to compete for standings in the division; they are afforded one male alternate and one female alternate (two alternates).

Men's Division teams must consist of six men. They are afforded one male alternate.

Women's Division teams must consist of six women. They are afforded one female alternate.

Open Division teams are 6 person compositions that DO NOT fall into the other 3 categories. They are afforded one person as an alternate.

Team Participation

Each individual on a team will compete in one of the SINGLES events, one of the DOUBLES events (if part of the competition) one of the TRIPLES events (if part of the competition) and all TEAM events.

- a. Additionally, any Jack and Jill event that involves **2 or more** people, must have at least 1 female and 1 male participating together in the event (ex– doubles events) or in the leg of the event (ex– pairs in team events).

Scoring and Standings

Teams earn points proportionately, in each event according to every participant's performance in such events at any unique competition.

The team with the best performance, either fastest time or highest score earned, earns 100 points in its division (men, women, j&j, open). Then, other teams' performance in such events will be based on the proportion of their performance measured against the winner; their score/metric will act as the denominator and the winning performance metric as the numerator. *For example, if the winning time is 30 seconds, and the next fastest time is 34 seconds, the winning team earns 100 points, and the next fastest time earns 88.24 points ($30/34 = 0.88235294 \times 100 = 88.2352941$).*

Standings are determined for each team in their respective division by adding all the points earned for all events at the unique competition. The teams with the highest point values are victorious over teams with less total points earned.

At the conclusion of any competition the Meet Director has the discretion to award or celebrate as many winners as they wish, in any events, and for any accomplishments, in any competition. For example, as a celebration, some competitions may award memorabilia to all first place finishes in all singles events. It is the intent of this rule to allow flexibility, and encourage, a fun culture that is unique to any competition.

Events at Competitions

All NEILA sanctioned events must include at least a variation of the following events: Team Crosscut, Team Bowsaw, Team Pulp, Team Log Roll, six different singles events, and three different doubles events.

Each team member should have equal participation, and influence on standings, at any competition. Any additional event(s) added to a competition must reflect the involvement of all 6 persons on a team. *For example, if a competition adds a Doubles Event, then they will need to add three different doubles events, or allow all six competitors to participate in 3 heats of the exact same doubles event and each leg will be scored separately and have influence on the standings. It is the intent of this rule to underscore team-play where each person's athleticism is counted equally with their teammates.*

Community Equipment at Competitions

Meet Directors will provide equipment/supplies that are to be used by all competitors to maintain fairness and uniformity.

Community equipment may include sawing or chopping stanchions, birling log, splitting barrels, water boiling cans, soapy water, matches, weights for the packboard race, the chainsaw for the stock chain saw event (NOT the disc stacking event), belay system for the pole climb, and all of the competition wood for the contest. Special notes on equipment are covered in separate event rules.

Teams **may** be required to provide a pair of load binders and chains for their provided sawing stanchions. Teams may be allowed to bring their own stanchions as approved by the Meet Director.

Competition Wood and Allocation

Meet Directors are responsible to procure, prepare, and then provide all competition wood for their competition. Competition wood shall be as uniform as possible for each team in each division. Each division must compete on the same species of wood. Competition wood sizes must adhere to the dimensions indicated in the Event rules.

Meet Directors are responsible to uphold a standard for competition wood that reflects the NEILA Vision, Mission and Guiding Principles. *For example, every effort should be made to provide wood that is uniform in regards to quality/grade of wood, moisture content and other wood characteristics.*

Competition wood allocation will be random and determined by drawing lots before the start of the competition so that every team has an equal chance to get any wood allocation intended for that division.

Competition wood is expected to be consistent with other NEILA sanctioned competitions but may deviate depending on availability. It is important to meet the intent of the Guiding Principle- events should measure how fast and/accurately one can complete an event, in contrast to IF one can complete an event. For example, depending on wood quality, and assuming equal practice and technique among athletes, it is not appropriate that teams in one division can complete a chopping event (or other event) in less than 60 seconds, but teams in another division require 240 seconds to complete the event. Effort should be made by host institutions to organize competitions that include events that can be completed in a timely manner by all persons in any division. (Further, uniform wood sizes and quality provide a standard for athletes to gauge their improvement or deterioration in a specific event from one competition to another, and therefore honoring the Guiding Principles of competition and personal improvement.)

Safety and Liability

Insurance

Hosting colleges or universities or other institutions will not be held liable for accidents which might occur before, during, or after a competition.

All teams must be covered under the insurance of the academic institution just as other sports teams at such institutions. Meet Directors have the discretion to require persons to execute an assumption of risk form specific to the host institution before participating in any competition as an additional measure to protect the institution from any litigation.

Personal Protective Equipment

All competitors using an axe in any event are required to use protection on their legs and feet. All chopping axes should have a sheath. Failure to comply with safety regulations will result in disqualification for the event in question. Substitutions will not be allowed for such forfeited events.

ANSI Z87 eye protection must be worn for chainsaw events. OSHA chainsaw chaps must be worn for chainsaw events AND anytime a chainsaw is being used during a competition including at team's trailers when prepping for any event. Failure to comply with safety regulations will result in disqualification for the event in question. Substitutions will not be allowed for such forfeited events.

Meet Directors will make every effort to establish 'safety corrals' or 'event areas' that provide a safe place for athletes to complete events. Meet Directors have the discretion to limit any persons in such areas.

Safety Precautions- Event Starts

For all timed events the starting count-down will be as consistent as possible for all events, with a consistent tempo, and consistent tone so each competitor can time their start appropriately.

Each event start should follow as closely as possible this format : "Contestants ready?" "Judges and timers ready?" "3-2-1-GO"

False Starts

In events where 'starts' are easily redone such as packboard relay, pole climb, team pulp, and log rolling, the judge will quickly stop the contest and instruct everyone to prepare for a fresh start if a team begins too early.

- i. In events where 'starts' are not easily redone because of wood allotment, such as cross-cut and buck sawing, speed chopping, splitting, fire building and single bucking, the time will start on the word "GO". There is a penalty for early starts.

Judging Errors

If a team feels an error has been made in judging or scoring, the captain of that team should notify the EVENT judge as soon as possible. The MEET DIRECTOR has the final say in any discrepancies NOT resolved by the EVENT JUDGE.

Whenever possible, real-time videos may be substituted by the Meet Director to re-time any event.

Event Time Limit

If any contestant(s) cannot finish any timed event, they may stop the event by telling the judge. To prevent dangerous fatigue and to expedite the contest, time limits are set in the event rules. Time limits are indicated in individual event rules.

Complete Cuts

In sawing events, a complete cut is defined as one where the kerf made by the saw passes completely through the log. Broken cookies count if they can be put together to make a full disk and cut-outs can be restarted. Cookies dangling by a sliver or bark strip shall be considered full cookies as determined by the event judge. *Note: at the discretion of the Event Judge, they may make a determination if the saw did sever the same amount of wood as a regular cut- this is hard to determine depending on the kerf width of the saw. The burden of proof is on the competitors, not on the Judge, and the Meet Director has the final say if there is discrepancy.*

Sawing Event Stop Time

Time for any sawing events will stop when the last cookie comes free from the log/cant.

Spare Equipment

Spare equipment may be used only if original equipment breaks or falls apart. Spare equipment may be held only by the officially designated alternate or team coach. *Note- it is the intent of this rule that each competitor start and finish an event with the original piece of equipment chosen for the event.*

Practicing/Testing Equipment Before The Start Of An Event

For events that are 'communal' where all teams will use the same or similar component of an event, competitors may not try out the events (wood, cants, pulp, etc) prior to the real competition. For example, no one may roll the rolling log, throw an axe at the target, or test the weight of the pulp logs before their official turn.

Schools can bring their own practice wood/stanchions to use at their discretion.

If at any competition, a school is allotted their own cant, or wood for chopping or sawing, they can use such wood to practice their equipment with and then forgo any relief from any specific wood allotments pertaining to any event. For example, if a team decides to practice sawing on a cant, and use wood during practice that could be used during competition, and then run-out of wood to use during their real event competition, it is their loss and not the responsibility of the host school or event judge to afford any additional relief to the school. Event judges are NOT to allot any additional wood to any team if the rules call for specific allotments.

Competitor Acknowledgement

Upon completion of each event, one competitor must sign the Judge / Timer sheet to acknowledge the time and penalties as recorded.

NEILA Events

Team Events

Team Bow Saw, Team Crosscut, Team Pulp Toss, Team Log Roll 1, Team Log Roll 2, Team Log Roll 3, Team Log Roll 4, Team Pack Board Relay, Team Packboard Firebuild, Team Singles Relay, Team Canoe Relay.

Canoeing Events

Singles Canoeing, Doubles Canoeing, Portage, Team Canoe Relay

Singles Events

Disk Stack, Stock Chainsaw, Pole Climb, Single Buck, Axe Throw, Singles Canoe, Birling, Hard Hit, Obstacle Pole, Super Swede 1, Super Swede 2, Triathlon, Bow Saw Hard Hit, Hard Split, Vertical Chop

Doubles Events

Underhand Chopping, Vertical Chopping, Scoot Load, Fire building, Crosscut to Death, Crosscut to Hell, Barrel Splitting, Quarter Splitting.

Triples Events

Underhand Chopping, Barrel Splitting, Quarter Splitting

Team Bow Saw

Description: Using a 42" bow saw blade mounted on a frame a team of 6 competitors must cut through a cant of wood as fast as possible one competitor at a time.

Set-up: A saw bunk with a bound 8x8 or 6x6 or any predetermined size cant of wood. Some events will allow for an entire cant per team or an allotment of community wood. Schools may impose a wood allotment of no less than 8 inches for communal sawing wood.

Procedure:

1 cut per person

Each team member must make the required number of cuts (1-2) with a standard bow saw

All cookies must be complete or if broken must be able to be pieced back together to form a complete cookie

Scoring: Each teams score for this event will be determined by the elapsed time plus additional time for penalties. If a team member "cuts out" they must cut another complete cookie. Penalties are as follows:

- 1) Each incomplete cut: 30 seconds
- 2) Early start: 30 seconds
- 3) 10 sec penalty each cookie over the allotment. (if any of the line is remaining, there will be no penalty)

Team Crosscut

Description: Using a cross cut style 2-man saw a team of 6 competitors must cut through a cant of wood as fast as possible alternating through 3 pairs of sawyers.

Set up: A saw bunk with a bound 8x8 or 6x6 or any predetermined size cant of wood. Some events will allow for an entire cant per team or an allotment of community wood. Schools may impose a wood allotment of no less than 8 inches for communal sawing wood.

Procedure:

3 cuts per pair

Each pair of sawyers will make the required number of cuts (2-3) using any type of crosscut saw.

The three pairs of sawyers will cut their required cookies and hand off to each other sequentially in the team crosscut

All cookies must be complete or if broken must be able to be pieced back together to form a complete cookie

Scoring: Each team's score for this event will be determined by the elapsed time plus additional time for penalties. If a pair "cuts out" they must cut another complete cookie. Penalties are as follows:

- 1) Each incomplete cut: 30 seconds
- 2) Early start: 30 seconds
- 3) 10 sec penalty each cookie over the allotment. (if any of the line is remaining, there will be no penalty)

10 minute time limit

Team Pulp Toss

Description: In Team Pulp, team members will throw pulp sticks back and forth between two sets of stakes as quickly as possible.

Set up: The men's pit will have posts at the corners of a 4' x 20' rectangle, and the women's pit and Jack and Jill pit will have posts at the corners of a 4' x 15' rectangle. Each pit will have 4 pulp sticks that are 4' long.

Procedure:

No pulp stick in play shall exceed 7" in diameter

One judge will be stationed at each end of the pit.

An 'invisible/imaginary' inside-front plane exists between each of the two end posts which starts at the inside-front of the posts. Its width extends into perpetuity.

Before the start, all four sticks will be placed at one end of the pit by the competitors. Three competitors will be at each end of the pit. At the start, the first competitor will pick up and throw the four logs (one at a time) from behind the imaginary plane, towards the other end, attempting to make them count as successful throws.

A successful throw is one that results in the log lying between the two posts, breaking the inside-front plane of the posts, and resting with any portion of log breaking/resting on the plane (log must be resting on both sides of the plane).

After all four logs have been thrown, a log that lands breaking the inside-front of the plane, in between the end posts, does count as a successful throw (i.e. counter). Note, the counters are only added to the total after the four pulp logs have been thrown and have come to rest.

Before the second contestant starts his or her four throws, the logs must be drawn beyond the **inside-front** plane. Note- the logs DO NOT need to pass through the end posts before being thrown by the next competitor, they only need to be pulled over the plane.

Once the second competitor begins throwing, he or she cannot step across the imaginary plane. The third, fourth, fifth and sixth competitors will continue, and then the first one will begin again.

After one contestant has thrown his or her fourth log, the next contestant must wait until all four logs have stopped moving before they begin their involvement in the event.

The time for this event will run until the 48th successful throw has landed even if the 48th throw happens to land before a set of four throws is finished.

Scoring: Each team score will be determined by the elapsed time, plus any additional time for penalties as follows:

- 1) Intentionally touching a log before your turn: 10 seconds per infraction.
- 2) Stepping across the imaginary plane, between the two stakes after beginning a sequence of four throws: 10 seconds for each infraction.
- 3) Failure to pull logs behind the imaginary plane of the stakes before a contestant begins throwing: 10 seconds for each infraction.
- 4) False start: 10 sec

Team Log Roll 1 (no deck)

Description: The object of this event is for three pairs of teammates to roll a log, with the aid of peaveys and/or cant hooks, along a designated course as quickly as possible.

Set-up: The Log Rolling course will have pairs of stakes marking each end of the course at a distance of 1-ft shorter than the length of the log. The log will be no more than 12 feet long. Generally the women's and Jack and Jill log should be lighter than the men's. The log width shall not exceed 14" in diameter for any division.

Procedure:

At the start the first two contestants will roll the log along the course beginning with the log touching the starting stakes then roll the log down the course using peavies and hit both stakes at the other end of the course. They will then roll the log back to touch both starting stakes and "hand off" to the next pair.

Any contact between log and stake will count as a "touch". The judge will call out when the stakes have been hit.

Only two contestants may be rolling at one time.

The time will stop when the third pair completes their roll.

Scoring: Each teams score will be determined by the elapsed time plus additional time for penalties as follows:

- 1) Missing a stake before returning or switching to the next pair: 30 seconds
- 2) Competitors touching the log other than during their turn: 10 seconds
- 3) False start: 20 seconds
- 4) Intentional use of body parts to move the log: 10 seconds.

Team Pack Board Relay

~25 pounds
Legs ~0.25 mi

Description: The purpose of this event is for each team to run a relay course carrying a pack board with a blanket, rope, and weight. Team members will hand the tied pack off to each other similar to a baton.

Set-up: Each team supplies its own pack board without any load supporting extension or shelf, rope and a blanket at least 4' by 4'. Host school will supply the weights for the contest with no weight exceeding 50lbs. Team captains will be shown the course. Captains will be responsible for showing the course to the rest of their team members.

Time Limit: 15 minutes

Procedure: Before the event begins, the rope, blanket, weight, and pack board will be spread out on the ground behind the starting line. The rope must be free of knots and no items may be touching each other. The first contestant will be ready to start; the other five teammates will be at the exchange areas along the course.

At the starting signal the first person will wrap the weight with the blanket, lash these to the pack board and run to the first exchange area.

At the first exchange area, the second person will take the pack board and run to the next exchange area. The process is continued until the sixth person crosses the finish line with the pack board and entire load.

The time for this event will stop when the sixth competitor and the pack board, the weight, the blanket, and the rope completely cross the finish line.

Only one person at a time may be touching the pack board or load except at an exchange area.

If the pack should fall apart, it must be re-lashed immediately before continuing on the course.

Scoring: The teams score will be determined by the elapsed time taken to complete the course, plus any additional time for penalties as follows:

- 1) Runner not staying on the course: 5 minutes per infraction.
- 2) Crossing the finish line without the pack board, the blanket, the weight, the rope, or the sixth contestant: 5 minutes.
- 3) Two or more people touching the pack board or load outside of an exchange area: 1 minute.
- 4) Load not supported by the pack frame (running with an arm load of unconsolidated blanket, weight, rope and pack frame): 2 minutes.
- 5) Interfering in any way with a competitor on the course. 1 minute for the team responsible.
- 6) False start: 30 seconds.

Singles Canoeing

7 minute time limit

Partner can push off in hand off zone

Description: The object of this event is for two contestants individually, to canoe a course for speed. One person paddles the first leg then the canoe is passed to the second person who canoes the second leg.

Set-up: The unique course will be defined by colored floats and other markers.

Procedure:

Prior to the start, the first contestant will be in the canoe behind the starting line marked by two floats. When the judge signals that all is ready, the contestant may begin. The time for the event begins when any part of the canoe crosses the starting line.

The contestant will paddle the first leg of the course, as defined by the floats. Penalties will be assessed for passing a float on the wrong side or not following the correct course (see scoring below).

At approximately the halfway point, an exchange area will be marked. From within the exchange area, the second contestant will take over.

The second contestant will then complete the course in the same fashion as the first. Timing will stop when the canoe completely crosses the finish line marked by two floats.

Scoring: A teams score for Singles Canoeing will be determined by the total elapsed time taken by the contestants to complete the course, plus any additional time for penalties as follows:

- 1) Passing a float on the wrong side of the canoe: 20 seconds per float (no penalty will be assessed for submerging a float as long as it does not show on the wrong side of the canoe).
- 2) Skipping a float entirely: 30 seconds per float.
- 3) Going around a 360 degree (white) float without crossing your wake: 30 seconds per float.

7 minute time limit
Cannot be pushed off by other teammates

Doubles Canoeing

Description: The object of this event is for two team members, simultaneously, to canoe a course for speed. Doubles is the same, in concept, as Singles Canoeing except that two people work together to paddle one canoe around a separate course. No exchange is made.

Set-up: The unique course will be defined by colored floats and other markers.

Procedure:

Prior to the start, the two contestants will be in the canoe behind the starting line marked by two floats. When the judge signals that all is ready, the contestants may begin.

The time for the event begins when any part of the canoe crosses the starting line.

The contestants will paddle the course, as defined by the floats. Penalties will be assessed for passing a float on the wrong side or not following the correct course (see scoring, below).

Timing will stop when the canoe completely crosses the finish line marked by two floats.

Scoring: A team's score for Doubles Canoeing will be determined by the total elapsed time taken by the contestants to complete the course, plus any additional time for penalties as follows:

- 1) Passing a float on the wrong side of the canoe: 30 seconds per float. Note: no penalty will be assessed for submerging a float as long as it does not show on the wrong side of the canoe.
- 2) Skipping a float entirely: 60 seconds per float.
- 3) Going around a 360 degree (white) float without crossing your wake: 30 seconds per float.

Portage Canoeing

7 minute time limit

Partner cannot push off each other

Description: The object of this event is for two contestants to paddle and to carry a canoe and paddle around a land and water course for speed. One person completes the first leg, which consists of a portion in the water and a portion on land carrying the canoe and paddle. The canoe and paddle are then passed to the second team member who runs the remainder of the land leg, launches the canoe and then navigates a water leg to finish.

Set-up: The water portion of the course will be marked by floats, and the land portion will be marked by flags, tape, signs, etc. Teams supply their own canoes and paddles.

Procedure:

Prior to the start, the first contestant will be in the canoe, in the water, behind the starting line marked by two floats. When the judge signals that all is ready, the contestant may begin. Time will start when any portion of the canoe crosses the starting line

The first contestant will complete the water course and ascend to land to complete the portage portion.

At approximately the halfway point an area on land will be marked where the first contestant will pass the canoe and paddle to the second contestant. This exchange area is the only place where both contestants can be touching the equipment at the same time.

The time for the event stops when the second contestant, the canoe, and the paddle completely cross the finish line.

The contestants may not be physically assisted while they are on the course.

Scoring: The score for each team will be determined by the total elapsed time taken by the contestants to complete the course, plus any additional time for penalties. The penalties are as follows:

- 1) Missing a float or straying off the land course: 30 seconds each infraction.
- 2) Receiving physical assistance from another person, except from your portage teammate in the exchange area: 30 seconds each infraction.
- 3) Going on the wrong side of a float: 30 seconds each infraction.
- 4) Going around a 360 degree (white) Float without crossing your wake: 30 seconds per float.

Singles Disc Stack

Description: Using any single cylinder chainsaw one contestant will cut as many cookies as possible from a vertical cant. The cookies must remain on the cant in order to count. The competitor that cuts the most amount of cookies without them falling will win the event.

Set-up: Using a disc stack or standing block stanchion, a cant of wood (6x6 or 8x8) will be affixed vertically. Lines may be drawn in order to maintain straight cuts. Contestants must wear all required chainsaw PPE including chaps, ear protection and safety glasses.

Procedure:

Contestants must start the saw with 3 points of contact with the chain brake on.

The saw will be warmed up by the operator and when given the indication that the judge is ready, a competitor will be given their countdown.

The saw may be running at full RPM when a countdown is given.

The competitor will make as many cuts as they can within the allotted time (~~generally~~ 1 minute)

Each cookie must be completely cut through and balanced atop the vertical cant in order to count.

Counting cookies will stop when the allotted time ends or sooner if the contestant elects to stop cutting. If a competitor is mid cut when time is called, they may elect to finish that cut however it will not count.

Scoring: The amount of cookies that remain balanced on the cant at the end of the allotted time is the competitors score for the event. Penalties are as follows:

- 1) Starting the saw without 3 points of contact: warning first, then minus one cookie for each following infraction.
- 2) Starting first cut before “go”: minus one cookie.
- 3) Using saw to push a shifted cookie: minus one cookie per infraction.
- 4) A disqualification will occur if a competitor is not wearing the required PPE after “Go”.

Singles Stock Chainsaw

1 minute time limit
3 cuts - 8-inches of wood
No practice cuts

Description: The contestant will make the required amount of cuts consecutively in a cant, with the saw provided, in the shortest time possible, within 8" of allotment.

Set-up: A cant fastened to a saw buck will be available for each contestant. Contestants must wear all required chainsaw PPE including chaps, ear protection and safety glasses.

Procedure:

Contestants must start the saw with 3 points of contact with the chain brake on.

Contestants will start with their hands on the top of the cant. The saw will be running at an idle speed on the ground.

On a combined visual and verbal signal from the judge, the contestant will bring the saw up to the cant and make the required amount of cuts in a down, up, down sequence.

Cutouts may be re-sawn but must remain within the 6" of wood allotted and be in the same direction as the original cut.

Scoring: The elapsed time will be from the signal "go" until the final cookie is severed from the cant. Penalties are as follows:

- 1) A penalty of 5 Seconds will occur if a contestant exceeds their allotment of wood.
- 2) A penalty of 5 Seconds will occur if a contestant does not start the chainsaw using three points of contact.
- 3) A disqualification will occur if a competitor is not wearing the required PPE after "Go".

2 minute time limit

16-inch round white pine

Singles Single Buck

Description: Individual competitor will make one cut through a log in the shortest time possible using a single bucking saw.

Set-up: A log will be mounted on a cutting bunk so the bottom of the block will be approximately 18" from the ground. The log will be between 14" to 20" in diameter. One inch of clear wood will be allotted to each competitor. Any type of single buck saw may be used as long as it does not have a frame (like a bow saw). A starting kerf of ~~6"~~ 10" will be allotted to the competitor. One sprayer/wedger from the competing team will be allowed to assist the sawyer.

Procedure:

The individual will signal the judge when he or she is ready to begin.

The competitor will make one cut with the saw until the complete cookie comes free from the log.

The competitor must cut one complete cookie and if the cookie breaks it must be finished in a way that it can be pieced together to create a full cookie.

Scoring: Score for Single Bucking will be determined by the total elapsed time taken to make one cut, plus additional time for penalties as follows:

- 1) Cut not meeting the requirements of a full cut: 30 seconds.
- 2) Using more than the allocated wood: 10 seconds.

False Start: 30 seconds

Singles Axe Throw

Description: Contestants will throw a double bit axe at a vertical target.

Set-up: The target will be a cross-section cut of a large log, with the center 5' above the ground indicating the bullseye. The contestants may use any double bit axe with a bit no wider than 6", total weight no less than 2.5 pounds and a handle length of no less than 24". The competitor will throw from a line 20' in front of the target on the ground.

Procedure:

Each contestant will be allowed one practice throw before taking his or her official 5 throws.

The axe must remain stuck in the target until removed by the judge for the throw to count.

A throw landing across two different scoring areas will be awarded for a higher score.

Crossing the foot line before the axe hits the target will result in no score for that throw.

Either edge of the axe will be counted in the event of over-rotation.

Scoring: The score for this event will be determined by the contestant's total points for the allotted scoring throws. The scoring breakdown is as follows: (subject to adjustment pending log size)

3" diameter (bull's eye) 5 points

9" diameter ring 4 points

15" diameter 3 points

21" diameter ring 2 points

27" diameter ring 1 point

5 minute time limit

Pole will already be mounted

Competitor must run up the pole and complete 1 bow saw cut at the top

Time stops after touching the end of the log (same as starting position)

Singles Obstacle Pole

Description: A competitor must navigate an obstacle course which includes running up a diagonal bunked pole in order to complete a task at the top of the pole. There are many variations to this event. Some examples are as follows:

~~-Roll log with peavey, bunk log with peavey, run up pole, grab choker, run down pole, choke log, debunk log with choker~~

~~-Roll log with peavey, bunk log with peavey, run up pole, make a bow saw cut at the end of the pole, run down pole, split a cookie~~

Set up: Requires some form of bunked tree trunk on a diagonal. There must be a line to cross for mounting and dismounting the log. If bunking is involved, a notched log with a flat side on the ground will serve as the rolling bunk. Lines on the course will designate where competitors must be for the different facets of the event.

Procedure:

On "go" the competitor will begin the first installment of the event.

When running up the pole the competitor must cross the line on their ascent and descent.

If a competitor falls off the pole on the ascent they must restart their ascent from behind the designated line before continuing. If a competitor falls off the pole on the descent they must remount where they fell off before continuing.

The event ends when the last task in the procedure is completed.

Scoring: Score will be determined based on how long it takes the competitor to complete the obstacle course. Penalties are as follows:

- 1) False start: 5 seconds
- 2) Falling off the pole and not remounting: 30 seconds
- 3) Inability to complete any facet of the course: DNF

Incomplete cookie: 30 seconds

Singles Bow Saw Power Stroking

Description: Using a 42" bow saw blade mounted on a frame 1 competitor must cut through a cant of wood in the least amount of strokes possible. Strokes are counted as 1 push or pull of the saw regardless of how long the stroke is.

Set up: A saw bunk with a bound 8x8 or 6x6 or any predetermined size cant of wood.

Procedure:

The single team member must make 1 complete cut with a standard bow saw

All cookies must be complete or if broken must be able to be pieced back together to form a complete cookie

Scoring: Each persons score for this event will be determined by the stroke count and if a tie is to occur the scoring placement will be determined by elapsed time for the cut. If a competitor "cuts out" they must cut another complete cookie. Penalties are as follows:

- 1) No complete cookie DQ
- 2) Early start: 10 seconds added to time

Doubles Vertical Chop

8x8

8 minute time limit

Description: The object of this event is for two contestants to chop completely through a vertically supported cant in the shortest time possible.

Set-up: Host school will provide stands and ratchet straps to hold the cants firmly in place, about two feet off the ground. Safety gear, covering the foot and shin, must be worn.

Procedure:

The first contestant will chop through their half of the cant as quickly as possible. When the first contestant is through, he or she will step out of the way and signal the second contestant to start chopping their half. Both contestants must start with an up hit.

~~Variation: Each contestant gets their own block and must cut both sides (see singles standing block)~~

Time will stop when the top of the log is completely severed from the bottom portion held in the stand.

If a large piece of the top of the log should break off during the event (slab), the judge will determine whether or not the contestants actually chopped all the way through or if the slabbing was intentional.

Once the second person begins chopping, the first person may not chop again. Each person may chop only on their half of the block.

Scoring: The time for this event will be determined by the total elapsed time for both contestants to chop their halves or full blocks plus any added penalties as follows:

- 1) Two people chopping at the same time: 30 seconds
- 2) First person chopping after the second has begun: 30 seconds
- 3) Early Start: 30 seconds
- 4) Starting on a down hit: 30 seconds
- 5) Intentional slabbing: 30 seconds
- 6) Incomplete cut: 60 seconds
- 7) First person chopping significantly more than half of the cant: 10 seconds

Only the competing pair is
allowed inside the corral

Doubles Fire Build

Description: In Fire Building two contestants build a fire to boil 2 cups of soapy water in a can in the shortest possible time.

Set-up: Each team will be provided with a bolt of dry wood, three wooden matches, and a tin can with a wire handle. Just before the contest, each team will receive the same measured amount of soapy water. Each team may use a knife/drawshave and an axe to cut and split their firewood. The can may be supported using any technique (including another axe) and teams may build their fire and split on cookies. Foot protection is required for the splitter and can be booties, chainmail, or safety toe boots

Time Limit: 10 minutes.

Procedure: On the starting signal the contestants will split their wood and build a fire to heat the soapy water.

If the competitors cannot start their fire with the three original matches, they may get extra matches (one at a time) from the head judge or another designated person as announced at the start of the event.

If any water is spilled from the can during the event, the entrants must get a complete refill from the judge. No extra wood may be used.

The can must be supported so that it remains upright during the event. The intention of this rule is that contestants cannot intentionally tilt the can in an effort to heat the side of the can.

Nothing may be used to make a lid on the can.

The time for fire building will run from the starting signal until the water boils over the edge of the can.

A time limit of 10 minutes will be imposed for this event.

Scoring: Each team's score for this event will be determined by the elapsed time plus additional time for penalties as follows:

- 1) If a team is deemed to be purposely trying to break the rules, a disqualification will result.
- 2) Spilling water and not getting a refill: 8 minutes.
- 3) Using wood not from the original bolt: 5 minutes.
- 4) Tilting a can, or not righting a tilted can: 2 minutes.
- 5) Using a lid on the can: 2 minutes

Doubles Crosscut to Death

Description: Using a cross cut style 2-man saw, 2 competitors must make six (6) through a cant of wood as fast as possible.

Set up: A saw bunk with a bound 8x8 or 6x6 or any predetermined size cant of wood. Some events will allow for an entire cant per team or an allotment of community wood. Schools may impose a wood allotment of no less than 8 inches for communal sawing wood.

Procedure:

On "go" the pair of sawyers will make the designated amount of cuts using any type of crosscut saw.

All cookies must be complete or if broken must be able to be pieced back together to form a complete cookie

Scoring: Each team's score for this event will be determined by the elapsed time plus additional time for penalties. If the pair "cuts out" they must cut another complete cookie. Penalties are as follows:

- 1) Each incomplete cut: 30 seconds
- 2) Early start: 30 seconds
- 3) 10 sec penalty each cookie over the allotment. (if any of the line is remaining, there will be no penalty)

Doubles Cross Cut to Hell (variation) 8x8

Same as above, except the total cookies (cuts) is nine (9). Schools may impose a wood allotment of no less than 12 inches.

Note: 6 cuts to death, 9 cuts to hell

Triples Underhand Chop

Description: 3 competitors chop through their own 8"x8" or 6"x6" or any predetermined size cant as quickly as possible.

Set-up: 3 chopping cants must be prepared for competition before the event begins and arranged in an area established by the host school (note: teams must furnish their own stands). Lines are drawn on the blocks by the competitors or coaches. Foot and shin protection must be worn for this event.

Time Limit: 5 minutes per chopper or 10 minutes total

Procedure:

Cutting lines shall be drawn between foot holds at the full diameter of the block

Chopping is run as a relay (competitors working sequentially).

All persons who are not actually competing or acting as judges or timers must be behind the snow fence/rope barrier/safety area.

On the starting cadence (3,2,1 "go!") the first person will chop completely through his/her cant starting on the front side and finishing on the back side of the block.

When the first person has finished, the second person will chop his/her cant to completion followed by the third. Only one person may be chopping at a time.

After a competitor has finished chopping, he or she may not touch the chopped cant. The judges will inspect the cants after the event to make sure that they were completely severed. The head judge will have a final say under this rule.

Contestants may not chop a teammate's cant.

Scoring: Each team's score will be determined by the elapsed time plus any additional time for penalties as follows:

- 1) Two contestants chopping at the same time: 30 seconds.
- 2) Touching a cant before the judge's inspection: 10 seconds per infraction.
- 3) Any cant not chopped completely: cant still supports contestants weight without breaking: 60 seconds or cant has collapsed but not completely separated: 10 seconds.

Triples Barrel Split

Description: The purpose of this event is for 3 team members to split a designated amount of hardwood bolts (1 or 2 per competitor) into pieces small enough to fit through a hole cut in the bottom of an inverted barrel.

3 bolts - 1 per competitor

Set-up: Each team will be provided 3 or 6 bolts assigned according to the numbers drawn at the Captains' meeting. Each barrel should have a 5"x5" square hole cut into the flat end. Contestants may use any form of splitting hand tool. Foot protection is required and can be booties, chainmail, or safety toe boots.

Time Limit: 10 minutes

Procedure: Splitting is run as a relay with the competitors working separately.

At the starting signal, the first contestant will split his/her log(s) in pieces small enough to fit through the opening in the inverted barrel and then stuff all pieces into the barrel. Pieces must fit through the opening freely and may not be pounded or pushed through the hole.

When the first person is finished with their log(s) and the last piece has been stuffed in the barrel, the next competitor may begin their split and sequentially the third.

Only one person may be splitting at a time.

Each person may touch only his or her own log. Contestants may not touch their log while another splitter is working.

When the third person has completely finished stuffing the log pieces into the opening in the barrel, he or she yells "Time!" and the time watch is stopped.

All full length logs are considered in play and must be stuffed into the barrel.

The first competitor may assist the second by pulling the barrel off his/her stuffed logs and relocating it for ease of access.

Scoring: Each team's score will be determined by the elapsed time plus additional penalty time as follows:

- 1) The contestants working at the same time (includes handling wood, even if just to look at a piece): 30 seconds.
- 2) Forcing a piece through the barrel opening: 30 seconds.
- 3) One contestant touching another contestant's wood: 30 seconds per infraction.
- 4) Inability to get all required pieces would result in disqualification
